

BatteryGrip

For Canon Digital SLRs

- ▶ Double the power – with 2 Li-ion Batteries (in batterygrip or in camera).
- ▶ Vertical Shutter Release & Command Dial – BatteryGrip Pro allows for vertical shutter release as well as aperture and shutter speed adjustments depending on model
- ▶ Infrared Remote Controls supplied with all models
- ▶ Built-in Infrared Receiver & Remote Control included with most models
- ▶ Flexible power solution – choice of Li-ion or AA mignon batteries depending on model
- ▶ Built-in power management – regulates output to camera

HC-50D Infrapro

Vertical

Shutter Release &
1 or 2 Command Dials
(Depending on Model)

Double Power

Use 1 or 2 Li-Ion Batteries
(1 in batterygrip / 1 in camera)

For Canon 500D, 450D
& 1000D
Digital SLRs

Vertical Shutter Release

The "Infra/Infrapro" Ranges are fitted with innovative vertical shutter release, making shooting with the camera in a vertical position just as comfortable as shooting horizontally.

HC-50D Infrapro features an additional set of controls, which replicates the camera's original controls.

Remote Control

The BatteryGrips come with an Infrared Remote Control, allowing remote shooting within a range of up to 10-12m and reducing camera shake. The Remote control transmitter provides autofocus before shutter release and continuous shutter release or bulb function for as long as the button remains pressed.

Built-in infrared receiver

Infrared Remote Control

6 x Ni-MH or Alkaline in adaptor tray

1 or 2 Li-Ion In battery tray

Built-in Infrared Receiver

The "Infra/Infrapro" Range is specially designed for digital SLRs without an integrated infrared remote receiver. This gives an added benefit of a remote control facility to SLRs without an existing built-in system.

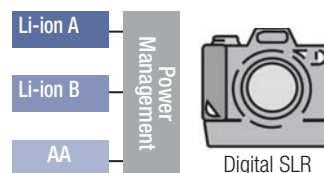

Flexible Power Solution

Some of the BatteryGrips offer a choice of 2 power sources:

- 1 or 2 Li-ion battery packs offer maximum performance.
- Rechargeable Ni-MH or alkaline AA batteries can be as a backup solution.

Extra Power

With 2 Li-ion Battery Packs the available power is approximately doubled for longer, uninterrupted camera use. With the BatteryGrip in place you avoid running out of power at a critical moment.

Power Management

Built-in Power Management regulates the power output to the camera for maximum efficiency. 1 or 2 Li-ion Battery Packs, even at different charge levels, can be used. The Power Management detects use of Li-ion or AA batteries automatically.

BatteryGrip Model	DSLR Model	Power Source		Built-in Infrared	Remote Control	Vertical Shutter Release	Camera Controls	Power Management	Weight w/o Battery	Part No.
		Li-Ion	AA							
BatteryGrip HC-7D	For Canon EOS 7D	1 or 2 LP-E6, or HL-E6	6 x AA Ni-MH or 6 x Alkaline	✓	✓	✓	✓	✓	293g	1000 238.5

Also Available For Nikon Digital SLRs

(see separate brochure for details)

HN-D90 PRO

For Nikon D90 & D80 DSLR

Also Available For Sony Digital SLRs

(see separate brochure for details)

HS-A350 Infra

For Sony A350, A300 & A200 DSLRs

Batteries not included. It is recommended, when possible, to use Rechargeable Battery Pack as a preference to Alkaline Batteries. (DO NOT use AA Lithium Batteries). Always use 6 rechargeable AA as one set. The camera may not function with AA Batteries when used below 0°C. Correct at time of print. Specifications and details may be subject to change without notice.
